John Boucher & his wife, Donna

John was diagnosed with Primary Peritoneal Cancer in his abdominal wall in March, 2015. He already underwent (9) weeks of chemo which unfortunately made his cancer worse. On July 5, 2015 he started a new type of Chemo which he will undertake for 3 to 4 months, and then hopefully will have surgery. Your donation to help John is very much appreciated!

THANK YOU FOR YOUR DONATION!
